DIRECTTECH INFRARED HEATING

WONDERFULLY WARM AND NICE TO LOOK AT

Since 2004, DIRECTTECH develops and produces High-End infrared heating panels whose efficiency sets standards.

With a stylish design, you easily bring the heat to where it is needed.

FUNCTION & DESIGN

Take advantage of the versatility of the DIRECTTECH heating panels and simply feel comfortable! Heat cost-effectively and act flexible to increasing outdoor temperatures.

- High-quality surfaces of glass, natural stone (marble) or mirror
- Various frame versions, as well as frameless panels
- Various colour combinations for glasses and frames
- Individual picture-, motif- or high-quality picture prints are available for all glass sizes

FLEXIBILITY OF APPLICATIONS

Choose your favorite from different sizes, a number of surfaces and several installation options.

- Simple wall- or ceiling installation
- Installation in grid ceilings (Odenwald)
- Ceiling installation in a plasterboard ceiling
- Corner bracket for niches
- 30° bracket for a wall installation
- Mobile heating panels with stands

TESTED & PROVEN

QUALITY is not only a word for us – real sustainability and customer satisfaction are our personal concern and the engine of our work.

DIRECTTECH High-End infrared heating panels are TÜV/GS certified, maintenance-free and allergy-friendly with a five-year guarantee.

**We stand for satisfaction, efficiency,
safety and innovative design – Made in Germany.**
